

Shop manager accounts API

End points:

- /profile/
- /update/<str:username>/
- /login/
- /logout/

Update account:

In this part of the application, a person with permission to edit worker data can set the start and end times of their work each day. Other data, such as the name, remains unchanged and unique for all time.

Permissions:

Only users who are manager

Methods:

POST

fields:

start_time as a time
end_time as a time

Profile:

The profile view allows all users to see their profile and access account information. The functionality of this endpoint differs for workers and managers. Workers can view their start and end times along with their personal information. Managers can see only their workers' accounts data(excluding start and end times), while also being able to view their own personal and account information.

Permissions:

All logged in users

methods:

GET

fields:

for managers:
 username as string
 first_name as string
 last_name as string
workers:
 {
 username as string

```
        first_name as string  
        last_name as string  
    },.....
```
